

**POLYCLONAL ANTIBODY TO  
MOUSE ILEAL FATTY ACID BINDING PROTEIN  
(IL-FABP, FABP6)**

<b>Catalog no</b>	HP8011 (lot number and expiry date are indicated on the label)																																					
<b>Description</b>	The polyclonal antibody recognizes mouse ileal fatty acid binding protein (IL-FABP or I-LBP) of both natural and recombinant origin. The IL-FABP protein is derived from the mouse <i>FABP6</i> gene. FABPs are small intracellular proteins (~13-14 kDa) with a high degree of tissue specificity that bind long chain fatty acids. They are abundantly present in various cell types and play an important role in the intracellular utilization of fatty acids, transport and metabolism. There are at least nine distinct types of FABP, each showing a specific pattern of tissue expression. Due to its small size, FABP leaks rapidly out of ischemically damaged necrotic cells leading to a rise in serum levels. Ischemically damaged tissues are characterized histologically by absence (or low presence) of FABP facilitating recognition of such areas. IL-FABP is localized in the intestine, ovary, adrenals and stomach.																																					
<b>Aliases</b>	FABP6, gastrotropin, ileal lipid-binding protein, I-BABP																																					
<b>Species</b>	Rabbit IgG																																					
<b>Cross reactivity</b>	<b>Cross reactant</b>	<b>Reactivity</b>																																				
	Rat IL-FABP	Yes																																				
	Other FABP types	No																																				
<b>Formulation</b>	1 ml (100 µg/ml) 0.2 µm filtered antibody solution in PBS, containing 0.1% bovine serum albumin and 0.02% sodium azide.																																					
<b>Application</b>	<table border="1"> <thead> <tr> <th></th> <th>F</th> <th>FC</th> <th>FS</th> <th>IA</th> <th>IF</th> <th>IP</th> <th>P</th> <th>W</th> </tr> </thead> <tbody> <tr> <td>Yes</td> <td></td> <td></td> <td></td> <td>•</td> <td></td> <td></td> <td>•</td> <td>•</td> </tr> <tr> <td>No</td> <td></td> <td></td> <td></td> <td></td> <td></td> <td></td> <td></td> <td></td> </tr> <tr> <td>N.D.</td> <td>•</td> <td>•</td> <td>•</td> <td></td> <td>•</td> <td>•</td> <td></td> <td></td> </tr> </tbody> </table>			F	FC	FS	IA	IF	IP	P	W	Yes				•			•	•	No									N.D.	•	•	•		•	•

	<small>N.D. = Not Determined; F = Frozen sections; FC = Flow Cytometry; FS = Functional Studies; IA = Immuno Assays; IF = Immuno Fluorescence; IP = Immuno Precipitation; P = Paraffin sections; W = Western blot</small>																																					
<b>Use</b>	For immunohistology and Western blotting, dilutions to be used depend on detection system applied. It is recommended that users test the reagent and determine their own optimal dilutions. The typical starting working dilution is 1:50.																																					
<b>Storage and stability</b>	Product should be stored at 4°C. Under recommended storage conditions, product is stable for one year.																																					
<b>Precautions</b>	For research use only. Not for use in or on humans or animals or for diagnostics. It is the responsibility of the user to comply with all local/state and federal rules in the use of this product. Hycult Biotech is not responsible for any patent infringements that might result with the use or derivation of this product.
